

Every batch of high-risk food

THE LIMIT	OPERATIONAL DEFAULT	CONTROLS THIS SATISFIES
Core $\geq 75^{\circ}\text{C}$ • reheat once only	The Pass's own working rule, drawn from UK kitchen practice. No regulatory claim.	CK.1 • CK.2

How to fill it in. Probe the thickest part, away from bone. Reheated food goes up once and once only – what comes back a second time is thrown, not re-warmed.

[illegible]
